DESCRIPTION

Applied Measurements Pa600 industrial pressure sensor comes with fast delivery times of 2 weeks and is specifically designed for the measurement of gas and liquid pressure measurement in general and industrial pressure applications. We can easily accommodate any requirement from a one-off to bulk orders for many thousands of sensors, all within our in-house, UK production facility.

The Pa600 sensor housing is constructed from 303 stainless steel and utilises a ceramic sensing diaphragm (96% aluminium oxide Al_2O_3), a Viton O-ring and a $\frac{1}{4}$ inch male process connection as standard making it suitable for a multitude of common sensing applications. Alternate casing and construction materials, O-rings and process connections can all be offered, including $\frac{1}{4}$ inch female and $\frac{1}{4}$ inch NPT male connectors.

Should you require a pressure sensor tailored to your specific pressure measurement application, we can design and manufacture fully-customised sensors for you – please contact our friendly sales team (<https://appmeas.co.uk/contact-us/>) to discuss your requirement in detail.

A wide variety of outputs can be offered from Applied Measurements Pa600 industrial pressure sensor including 4-20mA, 0-5Vdc, 0-10Vdc, 10mV/V and 20mV/V. Along with, a ratiometric 0.5-4.5Vdc signal (10% to 90% of supply voltage) that requires a 5Vdc (2.7 – 5.5Vdc acceptable) to suit most dataloggers.
